IP Phones

As a Polycom Platinum Partner, Certified Service Partner and Certified VoIP Reseller, VSGi provides its customers with exceptional service and all the right IP phones for a Hosted Business VoIP environment. VSGi will help select the proper set of IP phones for your business, then pre-configure and deliver them to your users so that they may seamlessly plug-in and continue with business as usual.

All Polycom SoundPoint IP phones, sold by VSGi, are pre-configured and tested to run on your IP network and include the following features right out of the box:

- **Polycom Acoustic Clarity Technology** - providing exceptional sound quality, echo cancellation and noise reduction
- **Power Over Ethernet (POE)** – power your phone with your LAN- saving the need to have AC power at phone location
- **Multiple Ethernet Ports** – plug your PC into your phone; operate multiple desktop devices from 1 Ethernet wall jack
- **HD Voice** – utilizes wideband audio for over twice the voice clarity (Available on Soundpoint 550 & 650 only)
- **Full Duplex Speakerphone** - speak simultaneously with your caller, without any dropouts in either one of your voices
- **Intuitive User Interface** - Large, feature-rich, backlit LCD display (Available on Soundpoint 550 & 650 only)
- Up to **18 dedicated familiar PBX-like function keys and up to 4 context sensitive soft keys**
