SOUTHAMPTON GENERAL HOSPITAL: CARDIAC UNIT USES VIDEO TO SHARE EXPERTISE.

Results : *Highly accurate remote diagnosis and knowledge-sharing with other hospitals regionally and globally*

INCREASED PATIENT CARE WITH CONTROLLED COSTS

Patients seek less travel, lower out-of-pocket costs and shorter wait times in their efforts to receive medical care. Healthcare providers face the constant pressure of increasing the quality of patient care, reaching new markets, and providing new services — all while controlling costs. Healthcare professionals thrive on sharing knowledge, and must overcome Continuing Medical Education (CME) limitations, scarce resources, and in some cases, a sense of isolation from the broader network of doctors and nurses.

Telehealth allows medical professionals to stay connected with their colleagues, improve their knowledge, access remote expertise, and significantly increase patient care.

TELEHEALTH OPPORTUNITIES

TANDBERG Telehealth combines healthcare and educational collaboration using a visual communication network. Visual communication empowers both physicians and patients by providing expertise where and when needed by allowing doctors to see more patients while providing increased levels of service. Furthermore, telehealth provides patients with universal access to healthcare no matter where they reside.

Successful telehealth programs may include:

- Remote consultations
- Remote diagnostics and assisted surgery
- Continuing Medical Education (CME)
- Grand Rounds
- Medical Interpretation
- Administration

With visual communication, a medical professional can be in a remote clinic and access specialty care or participate in Grand Rounds. Real-time collaboration with colleagues and patients is simple, no matter where they are physically located. And information is shared securely without compromising patient privacy or the network.

A SOLUTION DESIGNED FOR TELEHEALTH

Combining years of experience and expertise in the telehealth market, TANDBERG developed solutions that allow healthcare professionals to go beyond traditional healthcare environments to deal more effectively with real patient and community issues, including distance, time, resources, and money.

TANDBERG Telehealth Solutions are designed to bring quality care to patients with technology that is easy to use, secure, and reliable. Our extensive product ranges from specialized clinical solutions to individual desktop solutions, including large group educational systems, as well as mobile systems that moved from location to location; we offer a total solution for healthcare organizational needs.

TANDBERG Telehealth products are built around the TANDBERG codec, representing the most secure, advanced, and reliable video communication technology available in the market today. With the highest video and audio quality, TANDBERG products allow for interactive, natural meetings, and specialized Telehealth interactions.

BENEFITS OF THE TANDBERG TELEHEALTH SOLUTION:

- Numerous medical and non-medical peripheral devices can be connected to the video systems, including special cameras and scopes. High-resolution cameras and medical scopes allow for real-time video images of dermatology problems, ear, nose, and throat examinations, just to name a few.
- TANDBERG's common user interface simplifies use and minimizes end-user training. TANDBERG's MXP platform provides enhanced visual and digital-quality audio for accurate patient assessment.
- TANDBERG provides the best technology, highest reliability, and integrates seamlessly with existing business tools, such as Microsoft Office Communicator, Microsoft Outlook, or Lotus Notes.
- TANDBERG video systems support the highest level of security, including encryption and authentication to ensure patient confidentiality, satisfying HIPAA requirements for open and dial-in networks.
- Select countries offer a system designed to meet regulatory approval in a patient contact environment.

TANDBERG Telehealth Solutions have aided medical professionals in increasing patient care by ensuring that they are doing what they do best...treating patients
