MAXIMIZE THE REACH AND VALUE OF MULTIMEDIA PRESENTATIONS

Whether delivering a CEO briefing to an entire organization, facilitating regional human resource programs or delivering a distance education course, live presentations are a powerful organizational tool. The TANDBERG Content Server maximizes the impact, reach and value of presentations by streaming live presentations to personal computers and archiving content for future distribution.

Utilizing the Content Server, organizations can easily create and manage business-quality video and multimedia presentations, essentially turning any videoconferencing endpoint into a broadcast studio. Archived content extends the life of multimedia presentations, enabling those unable to participate in the live broadcast to view the content at their convenience, on-demand.

Whether accessing live or archived multimedia presentations, viewers can stream presentations from the Content Server in Microsoft Windows Media®, Apple QuickTime® or RealPlayer® formats.

Expanding your organization's message beyond place and time, The TANDBERG Content Server provides a powerful tool, leveraging a variety of multimedia content:

- Distance education
- Corporate training
- Product launch events
- Sales presentations
- Technology demonstrations
- Human resource programs
- Executive briefings
